### Fullstack php web developer

#### Rescom Creations

**March 2024 – September 2024**

Technologies: HTML, CSS, Bootstrap, PHP, MySQL

- Developed ADORSS, a comprehensive online platform designed to enhance academic activities for schools, teachers, students, and parents.
- Facilitated peer interaction by enabling students to connect, share results, and collaborate with classmates from different schools.
- Integrated a robust online library of approved academic resources, improving access to educational materials.
- Implemented features for online tests, quizzes, debates, and examination practices, fostering an interactive learning environment.
- Provided dedicated websites for individual schools, enhancing their online presence and communication capabilities.
- Improved information accessibility and streamlined communication between students, parents, and teachers, serving as an essential support tool for educational institutions.

### Fullstack php web developer

#### Hayapass

**November 2023 – August 2024**

Multi-Vendor Global Logistics Platform

Technologies: HTML, CSS, Bootstrap, PHP, MySQL

- Developed a multi-vendor logistics platform using HTML, CSS, Bootstrap, PHP, and MySQL, enhancing user experience for multiple merchants. Integrated secure payment solutions (PayPal, Stripe, Paystack) for safe transactions and designed order management tools to boost operational efficiency. Utilized Google API for real-time shipping tracking and structured the platform for scalability to support future growth. Customized the admin panel for better user management and streamlined administrative tasks.
- User-friendly interface for searching properties by location, price, and amenities. Secure payment gateways for safe transactions. Real-time availability updates for accurate property status. Robust booking management system for property owners to streamline reservations. The aim was to enhance accessibility and efficiency for renters and hosts worldwide.

**BA sphere LMS**

**Role: Wordpress Developer**

**Technologies: Wordpress**

**June 2024– August 2024**

Developed a customized WordPress Learning Management System (LMS) for a financial advisor company, designing a user-friendly interface for easy course navigation and access. Integrated features for course creation, progress tracking, and certification management, ensuring seamless integration with the existing website and branding.

## **Notable Projects**

### **Single Vendor Ecommerce Platform**

Developed a scalable e-commerce platform featuring real-time order tracking, secure payment gateways, and multi-user roles for streamlined vendor and customer management.

Technologies: PHP, Laravel, MySQL, JavaScript, Bootstrap

### **Multi-Vendor Logistics Platform**

Developed a scalable platform supporting real-time tracking, secure payment gateways, and multi-user roles.

Technologies: PHP, MySQL, JavaScript, Bootstrap

### **4 in 1 system (Ecommerce, Point-of-Sales, Inventory, Delivery System)**

The E-commerce module enables secure online transactions with integrated payment gateways, while the POS system supports in-store sales synchronized with real-time inventory tracking. The inventory module automates stock monitoring, restocking alerts, and analytics, providing actionable insights. Additionally, the delivery system offers real-time tracking for orders, ensuring efficient logistics and enhancing the overall customer experience.

### **Learning Management System (LMS)**

Built an LMS with course creation, progress tracking, and certification management.

Technologies: Wordpress, Elementor

### **Short-Term Rental Booking System**

Created a shortlet/property booking system with real-time availability and secure booking features.

Technologies: Technologies: PHP, MySQL, JavaScript, Bootstrap
