TECHNICAL SKILLS

Backend: Laravel, PHP, PostgreSQL

Frontend: Javascript, CSS/SCSS,

Additional skills: WordPress, WooCommerce, API Development, Plugin Development

PROFESSIONAL EXPERIENCE

ADORSS Remote—Software Engineer,

March 2024—September 2024

- Built a scalable education management system with a backend API for seamless mobile app integration to serve 100+ schools and thousands of users.
- Enhanced student collaboration by enabling result sharing, peer interaction, and access to online library resources.
- Implemented interactive learning tools, including quizzes and exam practice, increasing student engagement by 60%.

Hayapass, Remote—Software Engineer,

October 2023 - August 2024

- Developed a global multi-vendor logistics platform using PHP and MySQL, enhancing efficiency for multiple merchants. Integrated a secure API for eCommerce websites, allowing seamless Hayapass, a global multi-vendor logistics platform delivery integration.
- Implemented secure payment gateways (PayPal, Stripe, Paystack) and real-time shipping tracking via Google API, improving transaction security and operational transparency.
- Built a user-friendly property booking system with real-time availability updates, secure payments, and advanced search filters, optimizing accessibility for renters and hosts globally.

BASphere, Remote—WordPress Developer,

May 2024 - September 2024

- Built a tailored WordPress Learning Management System (LMS) for a financial advisory company, enhancing course accessibility and user engagement.
- Integrated key features, including course creation, progress tracking, and certification management, ensuring a seamless learning experience.
- Designed a user-friendly interface with smooth navigation and branding consistency, allowing for effortless integration with the existing website.

OTHER PROJECTS

CHB Software Engineer – PHP | 4 in 1 system (Ecommerce, Point-of-Sales, Inventory, Delivery System) [Website](#) 2022

The e-commerce module enables secure online transactions with integrated payment gateways, while the POS system supports in-store sales synchronized with real-time inventory tracking. The inventory module automates stock monitoring, restocking alerts, and analytics, providing actionable insights. Additionally, the delivery system offers real-time tracking for orders, ensuring efficient logistics and enhancing the overall customer experience.

Custom Username Checker Plugin, WordPress Developer [Drive Link](#)

2022

- A social media username checking system, allowing users to instantly verify username availability across Facebook, TikTok, Instagram, and Twitter.
